Russian partners were encouraged to participate in its work within the framework of the European inter-university project TEMPUS “Advanced M.Sc. Program in Ecology for the Volga-Caspian basin” – AMEV Tempus Project № 159305-TEMPUS-1-2009-1-DE-TEMPUS-JPCR. Chair of Economics, Industrial Goods Marketing and Supply Management under the guidance of Prof. Dr. Dr. h.c. Ulli Arnold and from assistance by Dipl. oec. Stefanie Opitz developed and successfully accomplished their training project.

During the first day of training Dipl. oec. Stefanie Opitz demonstrated campus territory at University of Stuttgart-Vaihingen and presented the Visit Objectives as well as Introduction to the Chair of Industrial Goods Marketing and Supply Management. Also Prof. Günter Baumbach (Program Director) told the participants of Training

Session about WASTE Study Program. Participants received details of particular interest on the Heat and Power Plant work.

Participants of Training Session during the visit of Biosphere Region on the Swabian Alb saw Biosphere Center in Münsingen as well as Former Military Training Ground.

Visitors were pleasantly surprised at the Welcome Session in the evening. Discussing issues in greater depth during the friends’ meeting unreservedly the colleagues evaluated results of the work of the TEMPUS Project AMEV as well as prospects of the entire project at all.

equipment of waste utilization and environment protection.

Meeting in the International Affairs Office at University of Stuttgart with Ms. Schuster and Ms. Hasel developed a picture of how the International Student Exchange Programs of the WASTE and WAREM worked.

In spare time Russian guests had trips to Strasburg, Esslingen and

Baden-Baden.

Meetings during the Training Session were predominantly professional in character; that is to say, for instance, participants might talk over the plans for forthcoming events. Finally, all the participants gratefully acknowledge the support and cooperation provided by German colleagues for the interesting Training Session at University of Stuttgart.
